Mobile: +1.415.800.4576.

Location: New York, NY

SUMMARY:

To lead a team of Developers at a startup, preferably with JavaScript at the forefront. A place where I can use my advanced programming skills to work guiding teams on small to large time-sensitive projects requiring bug free results and to apply my extensive knowledge of both Front and Back-End programming to create Rich Internet Applications. Specifically: an environment that fosters creativity and innovation.

SKILLS:

Mobile Skillset: iPhone Application Development, Native COCOA-Touch.

Front End Work: Angular.js, jQuery Expert. HTML5 and CSS3 with application of Twitter Bootstrap and LESS. Expert ActionScript 3.0 Programmer with extensive application of Client-side Design Patterns.

Back End Work: Much of my recent work has Focused on Node.JS and MongoDB. I'm a highly published Node.JS module author. Previously worked with CodeIgniter, Zend, MySQL, WordPress, PHP 5.3+ OOP programming. Mainstream API platforms including but not limited to Twitter, YouTube, and Facebook.

EXPERIENCE:

Ingk Labs – (http://ingk.com/)   August 2011 – December 2001

Senior Architect working on prototyping a yet to be released Enterprise Web App using Node.JS & MongoDB.
